LONG-RANGE FACILITY PLANNING TO BEGIN

On August 23, Dripping Springs ISD welcomed nearly 400 new students – representing a 6.7 percent growth rate – a trend that is expected to continue in future years.

To accommodate this steady and strong pace, planning soon will commence to evaluate current facilities, examine enrollment projections, and develop recommendations for additional or expanded facilities that would allow us to address the future needs of students. As such, we will be reconvening the Long-Range Facility Planning Committee in September to address this topic. This group will include representation from parents, community members, and business leaders, as well as instructional and administrative staff.

Anyone interested in serving on this group may contact our Finance and Operations Department at 512.858.3006.
