ROBOTICS TEAM ENDS SUCCESSFUL SEASON

The DSHS "Spring Konstant" robotics team competed in the UIL State Robotics Championships FIRST Division May 19 and made it to the quarterfinals, capping off a successful season that included qualification for the World Championship event.

At the state championship meet in Austin, the Spring Konstant and robot "Torsion" were selected by the sixth-seed alliance captain and advanced to the quarterfinals. The DSHS team also was one of seven teams selected whose work was displayed in the Texas "Hall of Fame."

Earlier this spring the team qualified for the World Championship based on winning the prestigious Engineering Inspiration Award at the Alamo Regional. In April at the world championships in Houston, DSHS won six out of 10 matches and finished with a #22 ranking out of 68 teams.

Spring Konstant has 38 members; the faculty sponsor is Marguerite Erickson.
