SURVEY DESIGN

- Panorama provides questions in “clusters” for purpose of national benchmarking
- Must use all questions in the “cluster” for data comparisons
- Custom DSISD sections were added to the Parent Survey (2) and Teacher/Staff Survey (1)

DATA INTERPRETATION

- “Favorable” definition varies
- Some items measure frequency, not positive/negative opinions
- Some response categories are ambiguous:
i.e. “somewhat”, “quite”, “slightly”
- National benchmarks are not available for individual questions, only “clusters”

DATA INTERPRETATION

- Some low “favorability” questions are high percentiles on national benchmark
- Some questions have high percentages of “don’t know” responses (removed for chart displays)
