

AP Chemistry Summer Assignment

To make the upcoming year in AP Chemistry a successful one, here is a checklist of things to do over the summer. There are separate posts in Google Classroom about each.

- Join the AP Chemistry Summer Review in Google Classroom (code 8jt2k1c)
- Order a lab notebook and bring it on the first day of school
- Memorize/review the polyatomic ions
- Watch the review videos if you need a refresher over any of the necessary topics

Good luck and I will see you in August!

-Mrs. Nevin
